ServiceAgent Hiring Team

Dear Hiring Manager,

I'm excited to apply for the Software Engineer – AI position at ServiceAgent. Your mission to build an "AI front office" for service businesses resonates with me—I've spent my career at the intersection of full-stack development and AI, and I'm drawn to the tangible impact of helping blue-collar businesses capture more revenue and hire more efficiently.

My experience aligns closely with what you're looking for. At Centigrade, I led development of FastAPI backend services while building responsive React/Tailwind frontends, reducing page load times by 50%. I also created an AWS Kendra-powered AI search system—experience directly applicable to building the AI-driven features and LLM integrations central to ServiceAgent's platform. At CarbonSustain, I architected a full system from prototype to MVP, building Node.js backends with PostgreSQL, designing AWS infrastructure with Terraform, and delivering client demos that leveraged LLM APIs to secure enterprise pilots.

I bring the exact technical stack you need: deep experience with React, Node.js, TypeScript, and PostgreSQL, combined with hands-on work integrating OpenAI and other LLM providers into production systems. At Belden, I developed LLM tools and container orchestration features with Python and Kubernetes, giving me the foundation for building the scalable automation pipelines ServiceAgent requires. I'm comfortable with the full spectrum—from writing clean, well-documented code to making architectural decisions that affect product direction.

What excites me most about ServiceAgent is the opportunity for direct impact at an early stage. I thrive in environments where I can own technical decisions, ship quickly, and see my work translate into real business outcomes. The combination of AI automation, third-party integrations, and customer-facing product development is exactly the kind of high-leverage work I'm looking for.

I'd welcome the chance to discuss how my background in AI-driven full-stack development can help ServiceAgent scale its platform. Thank you for your consideration.

Best regards,

Kentaro Vadney
